

HDR 10 TEST PATTERNS AND MOTION PICTURE MATERIALS

TESTS & ADJUSTMENTS

Adjust brightness, contrast, colour saturation, sharpness and other picture controls.
Test for important HDR system parameters such as peak brightness, tone mapping and ABL dependency.

SKIN TONES

See pleasing, natural skin tones with a organic look and feel. Experience clean images with a compelling rendition of color and specular highlights for a stunning impression of picture depth.

NATURE SEQUENCES

Witness True HDR motion picture sequences, without any CGI enhancements and feel the value of HDR for a true-to-life picture experience.

WIDE COLOUR GAMUT & CONTRAST SCENES

Be overwhelmed by the level of detail in the darkest and brightest areas of the image. See how TVs with HDR 10-technology are capable of reproducing vivid natural colors in everyday scenes and lighting environments.
